

Occasio Mastermind Group

Objective

The real transformation and learning of a new skill are achieved through PRACTICAL experiences...*learning by doing!*

Occasio International Advisory Services (Occasio) seeks to solve some of the challenges that professionals and businesspeople face when they do business in ENGLISH with foreign clients and partners.

Some of these challenges include:

- **Lack of confidence or practice** in speaking professional English in a business environment.
- Uncertainty about **different cultural communication and behavioral** norms.
- Do not know the **key words used in formal** English communications.

Through the *Occasio Mastermind Group*, we offer:

- **Simulation of real-life and work situations** so that you can prepare yourself better for the professional communications you use today (or will use in the future).
- An entire program focused on **real interaction and practice in live sessions**.
- **A learning experience with other professionals** in the group, which helps you to receive more feedback from people with a diverse mindset and valuable experiences.

Through the *Occasio Mastermind Group*, there will be a maximum of 6 people per group, so that we can promote more collaboration, learning, and a personalized support to each professional participating.

The program includes an important aspect of cultural understanding and communications between professionals from different cultures and countries in the overwhelming globalized world.

Format

- Online meetings using Zoom
- 1 month, with 2 sessions a week (each 1.5 hours), for a total of 12 hours
